

**IMPORTANT INFORMATION
ABOUT YOUR HUOT CUTTING TOOL STORAGE CABINET**

KEEP FOR FUTURE REFERENCE

This cabinet is equipped with smooth rolling, full extension, ball bearing slides.

To remove a drawer: Pull the drawer out until it stops at the full-extended length. There is a black positive catch on each slide. Push up on one and down on the other and pull the drawer out to remove it from its tracks.

To insure the long life of this cabinet it is important that the slides and bearing surfaces be kept clean and lubricated.

We also carry several sizes of webbing to protect your delicate tool edges. The webbing comes in a variety of sizes from .250 through 9". Contact your distributor for available sizes and ordering information.

We recommend the cabinet be used in combination with other Huot cutting tool storage products, chest, cabinet or workbench.

Caution: We do not recommend use in a vehicle. Open one drawer at a time to prevent tipping and push drawer all the way back to engage positive catch at rear of slide when closing drawer. We recommend a maximum of 3 units be stacked together.
